## READING PASSAGE: HELP OUR PLANET!

Hello! My name is Mark. I think our world is in danger because there is too much pollution. Air, water and noise pollution are big problems for us. We must protect the environment and "go green".

What should we do to save the planet? First, we should recycle paper, glass and metal. We shouldn't throw garbage around; we should always put it in the wastebaskets. Second, we should save energy. We should turn off the lights and unplug the TV when we don't use them.

Also, we should plant trees and use public transport or bicycles. We shouldn't waste water or cut down trees. Animals are very important, so we shouldn't harm them. If we work together, we can live in a clean and healthy world!

## QUESTIONS

A) Answer the questions according to the text.
